

BENTO GRID INSPIRATION

The image displays a Bento Grid layout consisting of several cards arranged in a grid. A central card features a woman with curly hair wearing glasses and a pink scarf, smiling while looking at her smartphone. This card is surrounded by other cards containing various statistics and promotional text.

Serverless data transformation. Define your function and deploy with a click. We take care of the infra.

Native Python with AI library support. Built for Python. Use any library you want.

Fully managed and data secured service. There is zero stress about maintenance updates or upgrades.

Real-time API connection. Connect to any real-time API like OpenAI, Google Maps, Weaviate, etc.

Alerting and reprocessing. We inform you of unprocessed events. Reprocess faulty events later.

Status update
All updates have been added to the current version ➔

Easy to start and scale infinitely. No message broker needed. No ramp-up time for infra. GlassFlow's robust technology scales for you.

By GlassFlow

Vineet Vardhan
@designvibes.uiux

Boost your performance with instant read replicas. They scale down to zero when idle and don't use additional storage.

Two rectangular cards side-by-side. The left card features a dark background with a central interface showing "CLI" and "API" with green glowing dots. The right card features a dark background with a digital clock showing "19:34" and a calendar grid.

Easy database ops via the API and CLI. Manage thousands of databases programmatically.

Instant Point-in-time recovery. Up to 30 days granularity down to the transaction or second.
